

Our product adapts to you - not you to the product!

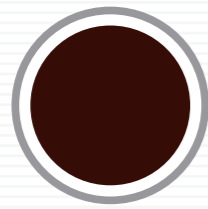

You decide how your garage door ought to look like. You are the one to select the size and the final look of the product. In addition, you can easily adjust automation to the chosen overhead doors and from then on park easily, quickly and without leaving your car.

Select a colour closest to your needs

We have prepared for you two standard colours (white and brown). You can also order the gate, in any of colours or veneers from RAL palette: golden oak or walnut. Choose a colour that best suits your needs.

RAL 9010 - white

RAL 8017 - Brown

golden oak

walnut

RAL palette

The colour samples above represent only a preview and should be treated as such. Differences in colour can be caused by printing technology.

OVERHEAD DOORS

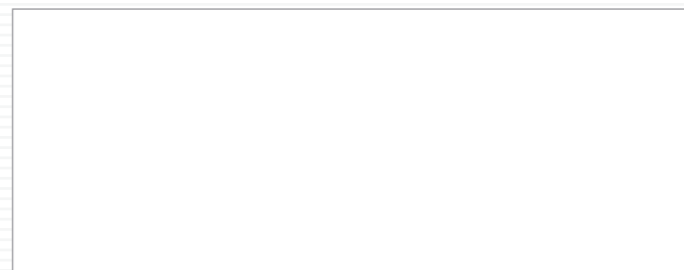

GMS Nawojowa SERVICE - created to serve!

We have a network of authorised installers in Poland. Call us, and we will make sure you get into contact with our expert in closest area, who will make careful measurements and help you in choosing the right type of gates.

If you have any questions, call us. We will be pleased to advise you, find the best solution for your needs and help you with choosing suitable additional options.

Our installers will mount your new garage doors in chosen time and provide you with all the information you need concerning the operation and maintenance for the garage doors.

SIMPLICITY AND FUNCTIONALITY

Stable and lightweight design, very attractive price and the possibility to include most popular additional options are the main features of our product that make our overhead gates the most popular choice for garage doors.

1 Permanent gate GMS Nawojowa

We are looking forward for you to enjoy the use of our gates as long as possible. Therefore, all steel components used in the production of gates are galvanized, and where it is possible, welding is replaced by bolting. In this way we reduce the risk of corrosion, extending the lifecycle of our products.

2 Cost effective solution

Configuration of the overhead doors provide a full functionality and the possibility to use main additional options, such as heating, interim wicket or automation ensures level of comfort similar to the one offered for the user of branded doors. However, the price for purchasing our overhead garage doors is less than half the amount needed to purchase branded doors, which makes our product most popular choice among customers.

3 Universal Products

Overhead gates provide universal solution for both individual and collective garages. The applicability of most popular additional options, such as glazing, inner doors or insulation gives additional possibilities for configuration. Basing on the way of application GMS Nawojowa offers 4 types of criterions for overhead doors:

Model	Profile of frame construction	Heating	Interim wicket	Manner of installation	Maximum surface
Protect 72/38	72x38	not	not	in the hole	2750x2280
Protect 60/40	60x40	yes (optional)	yes (optional)	in the hole	2780x2380
Optima	60x40	yes	not	after hole	2780x2380
Classic	60x60	yes	yes	in the hole	3000x3000

4 Safety

During the construction of all garage doors, we pay particular attention to the safety of use. Overhead doors are equipped with single spring that ensures a shield of protection against any accidental trapping, or with the thin package of springs (without cover), as well as specially designed sliding ensures a smooth movement of the gate in any situation.

NEW!

Gates Compact with scissor lift mechanism, and without any ceiling slidings.
